

## Tech Rider for Storybook Theatre of Texas

### For Schools, Libraries, and Theatres

Unless air travel is required or in a larger venue (see below), Storybook Theatre provides for all their A/V needs

#### **Storybook Theatre provides:**

- Sound system - Bose L1 Model II with B2 Bass
- Microphones – 3 Countryman headsets, Sennheiser receivers and transmitters with quarter inch or XLR plugs
- Apple iPad for show music.
- Full set may include backdrop, side panels, tables, artificial trees, bridge, lamp post, etc. as needed per story.

#### **Presenters to provide:**

- Cleared performing area. Preferably 20' wide x 15' deep. (We can adapt to smaller areas if needed.)
- Electrical access for multiple plugs.
- Bottled water for performers would be awesome

For our, **Two Pigs and T.H.E. Wolf** program we use a black light, therefore the ability to darken the room is preferred.

For our, *Who's Living Under Your Roof?* community parenting program: Presenter provides access to projector and screen for PowerPoint presentation.

Please Note: for larger venues, we plug into your sound system using our mics.

-----We do not perform for outdoor venues-----
